Re: Thermafiber's Intertek product listings

To Whom It May Concern:

Intertek's San Antonio facility, formerly Omega Point Laboratories (OPL), is part of a large division called "Commercial and Electrical". Our services include almost every field imaginable, such as textiles, toys, electronics, building, heating, pharmaceuticals, petroleum, food and cargo scanning. Intertek operates on a global network of laboratories and offices with over 20,000 people in more than 100 countries around the world. Our website can provide more detailed information: http://www.intertek.com.

This letter is in response to a request from Angie Ogino of Thermafiber, Inc. to verify that Thermafiber's Intertek product listings are currently active. After a review of documentation it has been determined that Thermafiber does have active Intertek product listings for Thermafiber FireSpan™ and FireSpan™ SS and Thermafiber Safing™ products. These products were removed from our Directory of Listed products and never reinstated due to an internal miscommunication. Intertek is currently working to correct this error.

Additionally, it should be noted that Thermafiber currently has an open project with Intertek to update the product names from Thermafiber FireSpan™ and FireSpan™ SS to Thermafiber FireSpan 90™ and FireSpan™ 40 respectively. Thermafiber Safing™ will remain under the same name.

We apologize for any confusion this oversight has caused and appreciate your patience while we work to correct it. If you have any questions or concerns, please do not hesitate to contact me directly at tracie.stanush@intertek.com or 210-635-8100.

Regards,

Tracie Stanush
