Smoke Seal Compound- Shelf Life

The shelf life of Thermafiber Smoke Seal Compound is 12 months from the date of manufacturing.

Every cartridge has a batch number, which indicates when the product was manufactured. Because this is a production code, the customer has no way of telling the manufactured date. Therefore customers will need to contact our Smoke Seal Compound manufacturer in Lamirada, CA at 714-521-0430. Personnel in Lamirada can look up the batch number and match it to the date it was manufactured.
