**Installation of Thermafiber Safing Insulation from Underneath Slab Edge**

In assemblies where Thermafiber can not be installed from the top of the slab edge, Thermafiber Safing Insulation can be installed from underneath the slab. Thermafiber has a tested assembly, CEG 12-20-89, where 4” Thermafiber Safing was installed from the underside of floor slab using safing clips mechanically attached to the underside of the slab.

For more information regarding this tested assembly contact Thermafiber, Inc. at 888-834-2371.
