

Thermafiber-Technical Bulletin

Does Thermafiber offer a Kitchen/Grease Duct Insulation material?

Thermafiber no longer offers a kitchen/grease duct insulating product, since we have not tested to the most current test standards required for fire rated kitchen/grease duct assemblies. If you refer to our current Industrial Felt, TF477c.pdf, data sheet at www.thermafiber.com, you will find that there is no mention of insulation for kitchen/grease duct applications. In fact at this time we do not recommend any of our insulation products for use as a kitchen/grease duct fire protection assembly.
